

Please accept this e-mail message to object the NAB Petition 04-160. This writer spent over 50 years in commercial broadcast and strongly feel additional freedom of speech again is being regulated and restricted. Remember Newton Minnow's comment many years ago about broadcast being a gigantic wasteland? Have you honestly monitored today's commercial broadcast stations? Today's satellite radio is like a breath of fresh air. Do not vote for the NAB petition 04-160.
Sincerely,

Robert R. Michael
